

ENHANCED SECURITY - CONSUMER ONLINE BANKING

Venture Bank is proud to use Enhanced Online Security - adding a layer of security to our Consumer Online Banking login process

How it works – Enhanced Online Security protects your security in two ways. First it allows the Bank to verify your identity through your Access ID and Password. Second, it allows you to verify the Bank's identity through a previously selected image and pass phrase.

To Enroll in Enhanced Online Security, follow these steps:

1. Log in by entering your current Access ID.
2. Click SUBMIT or Log In.
3. Enter your current Password.
4. Click SUBMIT or Log In.
5. Complete the Enrollment form:
 - a. Provide a current e-mail address.
 - b. Enter a pass phrase for the randomly selected image.
 - c. Provide answers for 3 challenge questions.
 - d. Select whether you are logging in from your personal computer or a public computer.
Only register personal computers that you frequently use and are not available for public use.
6. Click SUBMIT or Log In.

That's it. Next time you log in, Enhanced Online Security will recognize you and display your previously selected image and pass phrase.

Once you have enrolled in Enhanced Online Security, follow these steps to log in:

1. Log in using your Access ID.
2. Click SUBMIT or Log In.
3. Your previously selected image and pass phrase will be displayed.
 - a. If they match your previously selected image and pass phrase, enter your Password and click SUBMIT or Log In.
 - b. If the image and pass phrase displayed do not match your previously selected image and pass phrase, do not enter your password. Start over, or contact an Account Executive at one of our three locations for assistance.
